NOTES

- 1) Authentication flow
- 2) User Dashboard
- 3) Post service
- 4) Store service in Database
- 5) Display all service
- 6) Service Details page
- 7) Review System
- 8) Image uploads
- 9) Search + Filters
- 10) Mobile Responsiveness
- 11) Deployment

For this Monday.
Finish everything concerning
Client.

User → should not be able to leave review
to their own service.

The image is not showing
The Layout, the icon is too big
We need to change the layout
There should be edit service/
Delete service,

For the display card, on the
dashboard where everyone needs
to see, the name of the person needs
to appear,
Review needs work.

Service ID

Dashboard-

* Layout-

* Public should be able
to view name

* Pricing variant

* Edit service

* Images should not
show, replace with icon.

*

* Since no rating has been made, it should say, no rating/review
yet. and should be on 0.

Setting

* Themes

* Privacy policy

* Terms & Conditions

* Delete Account

* Download data

* Hide name

①

Type of Queries -

- 1) Address queries → Street number, Str name, locality, state, country, Postal code.
- 2) Point of Interest queries → Locally / Internationally known
- 3) Business queries ^{of characteristics}
- 4) Category queries → Group that shares set
- 5) Product & Services queries → Something that can be purchased at or is offered by a business or POI
- 6) Coordinates & "My location" queries.
- 7) Emoji queries → represent the category picture.
- 8) Queries with no map intent → Bad

Navigational Result

This means are there any real Results Results that would completely satisfy the user's intent

Rating Result - level issues

For each result, check to see whether there is an issue with the language/script of the result name/title.

→ The business/POI is closed or does not exist

* Don't consider minor spelling issues, such as missing or added diacritics.

Name of Business / POI

Title or Address →

Located → City, State, Country.

Address → Address although some POI can be non-localized → Feature type, Street name. fall under this, make research.

Feature without an expected address

* If you rate the result as Business/POI is closed or does not exist, you must still give a relevance rating as if the place were open or did exist.

Explicit Location → Location that are specific

Implicit Location → Location that are not specific

Query Result Connection

- General Connection
- Abbreviation/Alternate Name Connection.
- Category Connection
- Spell correction
- Translated Intent
- Special Character
- Address result
- Lack of connection
